

Notebook layout example

The three PDF files use this notebook with the default nbconvert layout, left prompts, and prompts above the code.

Markdown

Text supports **bold**, *italic*, and inline code.

- First item
 - Nested item
- Second item

A short quotation uses the template's block quote style.

Code and output

The cells below use Python's standard library.

```
[1]: from statistics import mean

values = [12, 15, 18, 21]
print(f"Mean: {mean(values):.1f}")
[value ** 2 for value in values]
```

Mean: 16.5

```
[1]: [144, 225, 324, 441]
```

```
[2]: def describe(values):
      return {"min": min(values), "max": max(values), "count": len(values)}

describe(values)
```

```
[2]: {'min': 12, 'max': 21, 'count': 4}
```

Mathematics and table

Inline mathematics: $a^2 + b^2 = c^2$.

$$\bar{x} = \frac{1}{n} \sum_{i=1}^n x_i$$

Item	Value
Minimum	12
Maximum	21
Mean	16.5

Long lines

Long code and output wrap within the page.

```
[3]: description = "This long line demonstrates how the template wraps code and saved_
      ↪output while keeping the original notebook source unchanged."
print(description)
```

This long line demonstrates how the template wraps code and saved output while keeping the original notebook source unchanged.
